THE NEWS-BULLETIN

Vol. 1, No. 15 — MOKENA, WILL COUNTY, ILL., FRIDAY, NOV. 27, 1919. — $1.75 Per Year

It's "Neck and Neck" In Big Auto Contest

Candidates are Working Fast and Furious and Votes are Piling High--Honors About Even.

EIGHT P. M. SATURDAY, LAST CHANCE FOR BIG VOTES

Subscriptions Turned in Before 8 O'Clock This Saturday Night is Positively Maximum Vote Getters.—Act Now and Win.

Here's How They Stand!

Mrs. J. Kolber, Mokena	193,550
Mrs. Louis Koerner, 704 Brown Ave., Joliet	5,000
R. M. Cooper, Orland	291,660
Elfreide Kreis, Mokena	5,730
Edna McDonald, New Lenox	5,200
Henry Boyer, Tinley Park	5,700
Grace E. Study, Frankfort	33,400
Hilmer Johnson, Mokena	343,120
Margaret Hopkins, Tinley Park	449,450
Elvin Bormet, Mokena	5,000
Everett Adrews, Frankfort	5,530
August Braun, Mokena	370,000
Minnie Handorf, Marley	5,200
Viola Wilkie, Tinley Park	85,420
Alvin Bruggeman, Frankfort	502,510
Ida Schultz, Orland	5,800
Lawrence Woodman, Frankfort	5,600

OUT-OF-TOWN CANDIDATES ATTENTION

In order to afford candidates residing outside of Mokena the same opportunity to work up to the closing hour of the "first period" as those residing here in Mokena, they will be privileged to mail their letters containing subscriptions as late as 8 o'clock Saturday night, November 29, and such letters will be accepted and "first period" votes issued thereon.

This ruling will apply to any other such subscriptions as may be in the mails on or before this hour and date, even though they are not received at this office until the following Monday.

Under a wager a man once stood on the corner of State and Madison streets, Chicago, the busiest corner in the world, and offered the thousands of passersby a $20 gold coin for $19. He stood for days before finding a taker. "It is too good to be true," said the skeptics.

To a much greater extent the News-Bulletin is offering you a better proposition in its big automobile contest, which comes to an official close on Saturday night, December 20. For proof of this statement read on:

If an opportunity were presented whereby you could secure without one penny of cost to you, a brand new 1920 Overland touring car, worth $960, for a little of your interest and spare time during the next few weeks, would you take it?

Or if you were offered a free vacation trip to Colorado—or elsewhere equal distant—or a $200 Brooks automatic repeating talking machine, or a purse of $50 in gold, or $25 in gold, would you accept it? Or would you stand back and say, "Surely it is not real; I never did nor ever could get so much, so quickly and so easily." And while thinking all these things—if thinking at all—let the other fellow step ahead and have it.

Opportunity for All.

But, remember, greater amounts than such sums are being offered and taken every day in this big go-ahead and ever changing world of ours. Look for the beautiful, if you would have it. The pessimist sees only the hole in the doughnut, while the optimist—well, you can guess the rest.

Now, the reason for the above statement is that the Mokena News-Bulletin will, on Saturday night, December 20—just three weeks from this coming Saturday night—award the above mentioned prizes to the most energetic hustlers of this community.

Here is an opportunity, surely, for the man or woman who looks at a thing from a business point of view, and who arrives at a conclusion as to merits by the way it appeals to them as a business proposition. **Someone will earn more than $300 a week for the next three weeks. How's that for a business proposition?**

Last Chance for Big Votes.

Don't forget that this coming Saturday night, at 8 o'clock sharp, is the last chance for big votes—not one minute later. After that time and for the next two weeks, the "second period" schedule of votes will be in effect, which means a material reduction in the voting power of all subscriptions—while the third and last "period" will see the scale of votes cut in half.

Leading candidates are seething with hustle and preparation for the final dash, and with one accord, are fighting valiantly and determinedly for the goal—where the big prize, Overland touring car, awaits.

Never in the history of contests was there one where the eve of the "first period" saw the leading candidates so close together and working so hard for supremacy. As the matter stands today any one of the six leading candidates have within their grasp that beautiful 1920 model Overland touring car, and the work from now until the close of the first period, 8 o'clock this Saturday night, is almost sure to decide who the winner will be. Why a few 5-yesr subscriptions turned in by any of them during the remaining hours of this period may bring to the lucky one that much coveted grand capital prize.

Alvin Aruggeman of Frankfort this week leads the field with more than a half million votes to his credit, Close on his heels and with but 2,000 votes between them, is Miss Hopkins, Tinley Park's favorite and popular candidate.

Aug. Braun, who up to tois time has not been considered in the "running" has srprised his friends and the entire community by dashing into third place, only a few thousand behind the leader, while Hilmer Johnson, R. M. Cooper and Mrs. J. Kolbe are so close to the leader that they might all say they are going to have the automobile for a Christmas present for themselves.

Speed Will Win.

The crucial test is now at hand. If you ever intend doing anything BIG in this race, DO IT NOW. Instead of being the second, third, fourth or fifth, "GET UP AT THE TOP and STAY THERE. Now is the time to secure surmountable reserve votes. Now is the time to make reasonably certain of the prize you most desire.

Never again, after this Saturday night, will it be possible to get the full voting power on subscriptions. This is final and fair warning. If you entertain any desire whatever of being declared winner of the big Overland touring car, worth $960.00, to be awarded Saturday night, December 20—just three weeks from this Saturday night—don't fail to turn every available subscription to your account before the close of the "first period."

Not to do so simply means that you will have to redouble your efforts during the remainder of the race to make up for lost ground. A few long-term subscriptions NOW may be the very ones needed to "cinch" the big prize; they could hardly help but win one of the major awards.

Alvin Bruggemann of Frankfort, Heads News-Bulletin Contest This Week.

Count on Facts Only.

As a timely warning, don't try to figure out [illegible] will take you to win, for you will surely fail to get enough. Don't be afraid of having too many votes; you can't have too many. It would be better to win the prize you most desire by a million more than enough than get left by a hundred thousand votes or so representing a mere handful of subschiptions.

Don't let this happen to you. You would never forgive yourself the fatal error. There will be no cause for regrets if you but heed expert advice and back it up with a goodly number of subscriptions.

At any rate, Saturday night will, to a considerable extent, tell the story. We can help only by telling you how. Your fate is in your own hands. You can sweeten or embitter it yourself. Your own subscription counts.

FIGURE THIS OUT FOR YOURSELF.

Here's an example of how easy it is to secure 500,000 votes in this contest:

25,000 votes are allowed on each 5-year subscription (new or renewal) to the Mokena News-Bulletin, providing same is turned in before the close of the "first period" terminating Saturday night, November 29.

Ten such subscriptions (amounting to $87.50 in business) would entitle you to 250,000 REGULAR votes. And, according to the offer of issuing 50,000 SPECIAL EXTRA votes on every "club" of $17.50 turned in ($87.50 constitutes five complete clubs) making 250,000 SPECIAL votes plus 250,000 REGULAR votes, or a grand total of 500,000 votes.

Therefore, ten such subscriptions, or approximately its equivalent in shorter term orders, would mean half a million votes. Easy enough, isn't it?

Haven't you ten friends who would help you to the extent of a 5-year subscription to the News-Bulletin (only $8.75) toward the winning of that splendid, brand new 1920 Model Overland touring car, worth $960.00? Surely you have. Try it and see.

Hunting and Trapping Licenses just received. Wm. Semmler, village clerk, Mokena.

STORK BUSY

Born to Mr. and Mrs. Murdock, nf Mokena on Thanksgiving Day an eight pound son.

TINLEY PARKERS HEAR FROM RELATIVES IN GERMANY

Tinley Park, Nov. 27.—Tinley Park people, having relatives living in Germany, have been receiving letters lately, telling of the dire privations now existing in the fatherland. Most of the poor people have little to wear and to burn. Everything is exceedingly high in price.

In addition to this the infants are dying like flies, for the want of milk, since the Germans had to deliver 40,000 cows to the allies. Conditions are worse than the average citizen has any idea of, according to the letters written. Some people who had seven cows had to give up four head to the allies.

George Schreiber recently received a picture of a "Kermis" held in Mullhausen, his home town, showing a large group of young folks and children in front of his brother's house. This was the first photograph received by Mr. Schreiber from home since the war.

TO GIVE XMAS DANCE.

The Tinley Park Volunteer Fire department is making preparations for conducting a Christmas dance at the Saenger hall December 26.

Ray Merwin, nephew of Mrs. C. Scheer, is very ill at the Silver Cross hospital, Joliet, following a serious operation.

Herman Stoeckman, who has been ill for some time with heart trouble is very ill.

H. C. Vogt is doing a rushing business in the phonograph line. He has started handling the Brooks automatic phonograph and the machine is taking well.

The Tinley Park merchants are busily engaged preparing for the holiday season.

A company of Tinley Park people are planning on going to Texas on a land excursion this week.

Tinley Park is looking for a big future as the result of the carrying of the $5,000,000 bond issue, which was voted and carried unanimously at the recent election. Work on this [illegible] The highway will start from One Hundred and Forty-seventh street, run through Geeselville, thence branch of toward Orland and down the Bachelor grove road to Tinley Park, and will then run straight through the village thence south to the William Maihoff corner and then on to Homewood. This highway will mean a big increase in property values to all Tinley Park residents and the farms of Bremen township. The plans now are to build concrete roads all over Cook county so that every city and village in the county can be reached by concrete road.

The Blue Island Automobile club was a big factor in getting this issue on the ballot. H. F. Bruggemann, local grain dealer and one of the officials of the Blue Island Automobile club, was very active in working for the bond issue.

FEIL PROPERTY SOLD TO WM. KAMPE, $3500

Frankfort, Nov. 27.—The past week has witnessed another important real estate transaction. On Saturday a deal was closed whereby Mrs. Christian Feil sold her residence and four lots located west of the village to William Kampe, the consideration being $3,500. Mr. Kampe is engaged in the cattle business. He will move from the farm soon onto his newly acquired property. He will continue in the cattle business after he moves here.

BAKERY SALE SUCCESS.

The Ladies' Aid society of the Frankfort Methodist church conducted a bakery sale at the R. E. Stephen's store Saturday afternoon. The sale only was of 20 minutes' duration and netted $20 for the treasury.

CELEBRATE TIN WEDDING.

Last Tuesday a large company of neighbors and relatives gathered at the home of Mr. and Mrs. George Hasenjager at a big surprise party in honor of the tenth anniversary of their marriage. The evening was pleasantly spent in playing various games and other amusements. Luncheon was served. Every one present enjoyed a most delightful time.

FORMER MOKENA GIRL HONORED AT SHOWER

Mokena, Nov. 27.—The home of Miss Alma Bechstein was the scene of a pretty utility shower Saturday afternoon given by former members of the late Mokena Camp Fire girls in honor of Louise Groth of Joliet and formerly a Mokena girl, who is to be the bride of Harvey Spiess in the near future.

The shower was to have been held at the home of Mrs. Wm. Semmler, but on account of the illness of the latter it could not be held at her home.

The rooms in the Bechstein home were prettily decorated, the color scheme being blue and white, the bride-elect's colors. Decorations in keeping with the Thanksgiving season were also much in evidence.

A very interesting program was carried out. In a contest "A Floral Love Tale" Miss Ruth Niethammer won the first prize. A unique and pretty feature of the program was the array of various bottles dressed as dolls. Each guest had been requested to bring a bottle of something useful dressed as a doll. Miss Eunice Hacker was awarded first prize for having the best dressed doll bottle. The prize winners in turn turned their prizes over to the bride-elect.

The gifts were pinned on a clothes line and the bride-to-be was obliged to guess the contents of each package, as she took it from the clothes line.

A luncheon was served, the blue and white scheme dominating. Favors consisted of tiny blue and white nut cups with a turkey and a pumpkin standing guard.

The out of town guests were: Miss Edna Bosold, Mannheim; Miss Myrtle Werner, Joliet; Miss Maude Sayers, New Lenox.

Mrs. Matthew Neton, who fell down cellar the first of the week, is getting along nicely. She sustained no broken bones, but was quite badly bruised and shaken up.

MANY FARMERS IN COUNTY JOIN NEW STATE ASSO.

The Will County Farm bureau and Illinois Agricultural association membership campaign began Tuesday.

Six representatives of the farm bureau in each township will co-operate with six field workers of the Illinois Agricultural association in the drive for membership for three years.

A member of the farm bureau will pair with a representative of the state association in enlisting the farmers of the county into both organizations. The combined cost of membership is $15 a year. One-third of this goes to the state association, the other two-thirds to the county farm bureau. Memberships will be sought on a three-year basis, the fee for the two organizations being $15.

The combined membership campaign will begin Tuesday in Wheatland township. George Boardman is chairman of the committee in this township. The method of procedure in all townships will be to take the state association representatives to a central meeting point, such as a school house, where they will be met by the committee of the farm bureau in that township. Then the paired workers will canvas the allotted territory.

The following schedule for canvassers has been arranged by those conducting the campaigns:

Wheatland—Tuesday, November 18; George Boardman, chairman.

Plainfield—Wednesday, November 18; H. C. Klett, chairman.

DuPage—Thursday, November 20; M. J. Patterson, chairman.

Manhattan—Friday, November 21; Robert Baker, chairman.

Homer—Monday, November 24; James Frazer, chairman.

New Lenox—Tuesday, November 25; Howard Francis, chairman.

Jackson—Wednesday, November 26; Herbert Hemphill, chairman.

Frankfort—Monday, December 1; James Owen, chairman.

No canvassing will be done on Saturdays.

FIRST DAY OF DRIVE FOR MEMBERSHIPS IN I. A. A. AND W. C. F. B.

The first day of the drive for memberships in the Illinois Agricultural association and the Will County Farm bureau ninety-one men were signed up by the five state workers. One-sixth of the township was not gone over, and some were not home in those parts solicited.

It is estimated that if this percentage is continued over the county that about 1,800 memberships would be secured. With the forming of the national organization by thirty-three states, farmers are all boosters, most of them waiting to be called upon.

"CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California." —Adv.

"What fools these mortals be" if "A fool and his money are soon parted."

ASPIRIN FOR COLDS

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Take strict heed to thy ways; set a watch over thy actions; and govern the thoughts of thy heart.—Dorothea Dix.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

COLDS breed and Spread INFLUENZA

KILL THE COLD AT ONCE WITH

HILL'S CASCARA QUININE BROMIDE

Standard cold remedy for 20 years—in tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture.

At All Drug Stores

RHEUMATISM

Mustarine Subdues the Inflammation and Eases the Soreness Quicker Than Anything Else on Earth.

Pay only 30 cents and get a big box of Begy's Mustarine, which is the original mustard plaster and is made of strong, real, yellow mustard—no substitutes are used.

It's known as the quickest pain killer on earth, for in hundreds of instances it stops headache, neuralgia, toothache, earache and backache in 5 minutes.

It's a sure, speedy remedy—none better for bronchitis, pleurisy, lumbago, and to draw the inflammation from your sore feet there is nothing so good. You get real action with Mustarine—it goes after the pain and kills it right off the reel. Yes, it burns, but it won't blister—it doesn't give agonizing pain a slap on the wrist. It does give it a good healthy punch in the jaw—it kills pain. Ask for and get Mustarine always in the yellow box.

STOPS PAIN MUSTARINE CANNOT BLISTER

FARM BARGAIN—70 acres, just off state road; good house arranged for 2 families, basement barn, silo, 2 hen houses, horse barn, corn house, 10 cows, 3 horses, 40 hens, manure spreader, grain binder, grain drill, gas engine and ensilage cutter, disk, spring and smoothing harrows, cultivators, plows, wagons and small tools; barns, silo and corncrib full. All land tillable but 2 acre wood lot. Price for all, $7,000. We are headquarters for central New York State Alfalfa Farms. FOUNTAIN & SLINDE, 211-212 Wieting Block, Syracuse, New York.

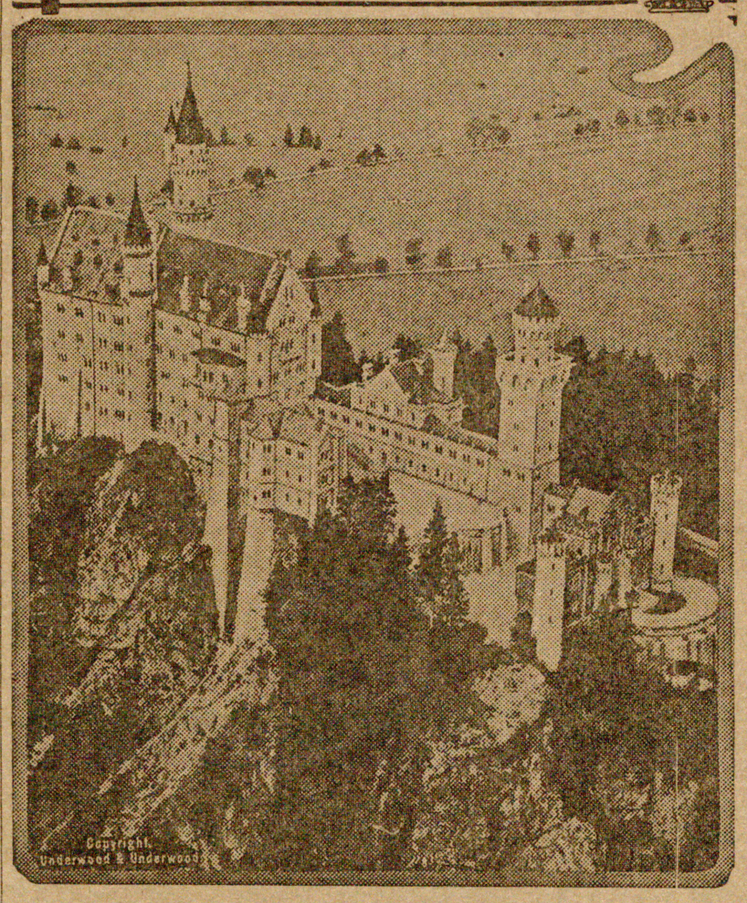
CASTLES of a MAD KING



Castle of Neuschwanstein.

NEWS comes from Bavaria that the new government there is negotiating with the ex-king, Ludwig III, now living as an exile in Switzerland, for a legal settlement on the state of his landed property in Bavaria. If this is so, it doubtless involves the most gorgeous trio of palaces built by any European monarch in modern times. These structures, says the New York Times, were well known to tourists before the war; in fact, so large and sumptuous are they, so hopelessly beyond the modest needs of the Bavarian royal family did they prove, that for a long time their only use was to provide a little revenue through the fees charged to the thousands of visitors who passed yearly through their spacious halls.

The palaces in question are Neuschwanstein, Linderhof and Herrenchiemsee, all three built by the "mad king," Ludwig II of Bavaria, who reigned from 1864 to his tragic death in 1886, and cost Bavaria such huge sums by his extravagance that he was finally deposed and locked up as incurably insane.

During the time that Ludwig was pouring out his own and the state's funds in rebuilding old castles and building the new ones that were to make his name a synonym for extravagance he was bound in intimate friendship with Richard Wagner, the famous composer. The signs of this friendship may be seen in one of the castles, Neuschwanstein, where there are many paintings of scenes from the legends upon which Wagner based his world-famous operas.

Neuschwanstein Most Remarkable.

Of the three great palaces which may revert to the Bavarian state as a result of the negotiations between the exiled Bavarian king and the government which overthrew him, the most remarkable, both in location and architecture, is Neuschwanstein. It is about eighty-five miles south of Munich, in the Bavarian highlands, three miles from the quaint old town of Fussen, and close to the old castle of Hohenschwangau, which originally belonged to the house of Guelph and was purchased in 1567 by the dukes of Bavaria. Hohenschwangau was the favorite residence of the mad King Ludwig, but, tiring of staying long in one place, he conceived the idea of building another castle-palace, in the manner of the kings of the middle ages. His eye fell upon a precipitous crag close to Hohenschwangau, and there, between 1869 and 1886, arose the splendid palace which ranks as the greatest of all the many monuments to Ludwig's building mania. Its name, Neuschwanstein, is due to the fact that the near-by castle of Hohenschwangau was formerly called Schwanstein.

Ludwig set three of the best-known Bavarian architects—Dollman, Riedel and Hoffman—to work on this creation of his wild fancy, and they reared for him a grand structure in the Romanesque style, planned somewhat after the style of the Wartburg. Here the influence of Wagner on the king may be traced, for the Wartburg, in Thuringia, is where Tannhauser and other singers meet, in the Wagnerian opera of that name, to compete for the landgrave's prize.

Neuschwanstein, however, was built on a much larger and more magnificent scale than the Wartburg. It is splendidly fitted up throughout, and from its windows there are surpassingly beautiful views of the Hohenschwangau, the Alp-See, a little lake far below, and the wild gorge of the Pollat.

Visitors ascend to the showrooms, which are on the third floor, by means of a stairway in the main tower, which juts up to a height of nearly 200 feet. The Wagnerian leanings, which were so important a part of King Ludwig's life, are evidenced again by a series of frescoes, showing scenes from the life of Siegfried, Tannhaeuser, Lohengrin and Parsifal, and from the lives of those two familiar figures in the "Meistersinger," Hans Sachs and Walter von der Vogelweide, which adorn the magnificent apartments of the third floor. In the gothic bed chamber, Wagner again comes to the fore, for it is adorned with scenes from the story of "Tristan and Isolde."

Product of Wild Extravagance.

Linderhof, another of Ludwig's fantastic palaces, is some seventy miles from Munich. Like Neuschwanstein, it also is in the Bavarian highlands, seven miles from the famous town of Oberammergau, renowned all over the world for its "Passion Play." Linderhof is in the rococo style, and was built between 1869 and 1879, when Ludwig was at the height of his wild career of money-spending. Its principal feature is the beautiful gardens that surround it, which attract large numbers of tourists, who combine a trip to the castle with a visit to Oberammergau.

In these gardens is a bronze equestrian statue of Louis XIV of France, evidence of the mad Bavarian monarch's hallucination that there was something in common between him and the great French ruler. This crops up again in the decorations of the interior of the palace, which include a series of portraits of French celebrities of the time of Louis XIV and his successor, Louis XV. Ludwig did not forget a statue of himself, which is one of the adornments of the gardens of Linderhof. Another object of interest is an artificial grotto, with a small lake and waterfall, which visitors may have illuminated with electric light, provided, however, that they number at least ten; or, if fewer, pay for as many as ten tickets—a good instance of the frugality which ruled in Bavaria following Ludwig II's career of extravagance.

Linderhof's gardens also boast a kiosk, in the Moorish style, with stalastic vaultings.

An Imitation of Versailles.

The third of the series of Ludwig II's "follies" is Herrenchiemsee, an imitation of the great palace of Versailles, situated on an island in the Chiemsee, a small lake fifty-seven miles southeast of Munich. Dollman and Hoffman, two of the architects who built Neuschwanstein (the former also did Linderhof), were engaged by Ludwig to design Herrenchiemsee. They worked on it between 1878 and 1885, but left it uncompleted, as by that time the Bavarians had had enough of the king's wild ways and were getting ready to lock him up.

Herranchiemsee is built on three sides of a square, in which are fine fountains—without water, though, for many years. In the vestibule is a beautiful group of enameled peacocks—these birds were great favorites with Ludwig. From the vestibule opens a court paved with marble, on the right of which is a staircase splendidly adorned with marble, stucco and paintings.

The mad king never really enjoyed any of his palaces. His malady grew upon him from year to year, and he spent much of his time restlessly wandering from one palace to another, indulging in wild night rides without definite aim, craving solitude.

As early as 1880, sixteen years after his accession to the throne, Ludwig's extravagance had brought financial ruin upon him, and it became apparent that something had to be done to check his follies. On the 8th of June, 1886, he was adjudged insane.

Highway Improvement

ROAD BUILDING IS BOOMING

Steady Increase in Federal Aid Business in All Sections—Expenditures $300,000,000.

(Prepared by the United States Department of Agriculture.)

Since early in 1919 there has been a steady increase each month in the federal aid business in the bureau of public roads of the United States department of agriculture. States in all sections of the country are filing their projects and receiving allotments. The road-building era is in full swing, and it would seem that the end is not yet. All indications point to greater records in the months immediately to come.

Based on complete reports from 44 of the states cash expenditures on the rural roads and bridges of the United States for the calendar year 1918 amounted to $286,098,193. To this should be added the value of statute and convict labor, which cannot be fixed with any great degree of accuracy but probably amounted to not less than $14,000,000, thus making the grand total expenditures for the year $300,000,000. This total is made up of the actual expenditures for such items as labor, materials, supervision and administration directly connected with the construction, improvement and upkeep of public roads and bridges outside the limits of incorporated towns and cities, and does not include any item for sinking-fund payments or redemption and interest on road and bridge bonds.

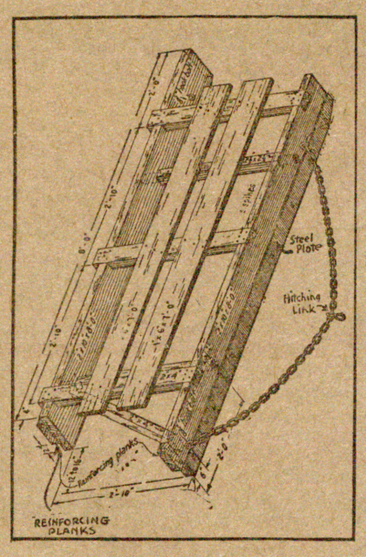
The year 1918 offered an unprecedented condition in practically all lines of highway work. There was not only a tremendous increase and expansion in the amount of heavy truck traffic on public roads and an unprecedented shortage in regard to road materials, labor and ready funds, but also a decided increase in maintenance work, which was, however, partially offset by a decrease in the amount of new construction.

PLANS FOR GOOD ROAD DRAG

One Shown in Illustration Is Adapted for Localities Where Lumber Is Plentiful.

(Prepared by the United States Department of Agriculture.)

The design for a road drag shown in the illustration is adapted for localities in which sawed lumber may be readily obtained. In this design the runners are made of 2 or 2½-inch boards, 10 inches wide and from 6 to 8 feet long, re-enforced with other 2-inch boards of the same length, but only 6 inches in width. If more convenient, however, 4-inch runners without re-enforcing boards may be readily substituted for those shown. The method of framing the runners together is a modification of that used



Detail Drawing Showing Typical Construction of Road Drag Built of Sawed Lumber.

in connection with the split-log type of drag. In this case only two of the cross braces have their ends fitted into auger holes like rungs.

In fastening the draw-chain to a sawed-lumber drag, it is usually advisable to run both ends of the chain through holes in the front runner or else make the connections by means of eye or hook bolts, as shown. The reason for this is that the sawed cross braces are seldom sufficiently strong to withstand the pull of the chain when it is looped over them, as is frequently done when round timber crosspieces are used. If straight-grained pieces are used for the crosspieces, however, there is no apparent reason why one end of the chain might not be connected by looping it around the 2½-inch square crosspiece near the cutting end.

Highway Travel Increasing.

Highways travel by means of the passenger automobile increased greatly during the past summer, fully fifty per cent.

Must Have Good Roads.

It costs money to build a good road, but we have got to have them, as the experience of the past and the coming winter will demonstrate.

Hard on Weed Crop.

Fall disking is hard on the weed crop.

DADDY'S EVENING FAIRY TALE

by MARY GRAHAM BONNER

© by the AUTHOR.

HORSE, DOG AND POLICEMAN.

"The big horse," said Daddy, "upon which the big policeman sat each day as he guided the motors and the people walking, and told them which way to go, had a chat with the policeman's dog.

"By the Fire."

"Now the policeman's dog did not help the policeman as he told the people in the city how they must go across the street and when they must go. The dog, though, played around the policeman's home and at night the dog would always have the policeman's warm slippers by the fire and his old smoking jacket on the chair, and his pipe and tobacco on a little table near the chair. He never failed to look after these things.

"So while the horse helped the policeman with his work the little dog help the policeman to rest and to be comfortable after his hard day's work.

"When the little dog heard the policeman as he would come home he would shake all over himself with joy. He would be so happy that his little body would wiggle and tremble and shake and move and his little tail would wag so hard that sometimes the policeman would say,

"'You're the best tail wagger I've ever seen.'

"Sometimes the policeman would take the little dog with him as he went to put his horse away for the night.

"And it was one of these times when the policeman was talking to his friends that the dog and the horse had this chat.

"'Isn't the master fine?' asked the little dog. 'He gives me such good things to eat.'

"'He gives me good things too,' said the horse. 'But, oh, how many lives he saves. He sees that people don't rush under the motor cars without looking, and that motor cars don't go rushing over the people.

"'He is always calm and quiet and he also always makes people feel calm and cool and less frightened.

"'But last night, doggie, I had a dream, really quite a bad dream. I had indigestion I do believe but I feel quite all right again now, I thank you.'

"For the dog had opened his mouth ready to ask that question as the horse knew.

"'I dreamed,' said the horse, 'of traffic. I dreamed of motors and horses and people all going this way and that and all getting hurt and no one doing anything right. And my dear master wasn't obeyed and he kept shouting,

"'"I don't want to be obeyed for my own sake, I only want to be obeyed for your sake.

"'"I want to be obeyed so I can make the motors keep in order so they won't hurt the people, and I want the people to obey me so it will give the motors a chance to go about their business.

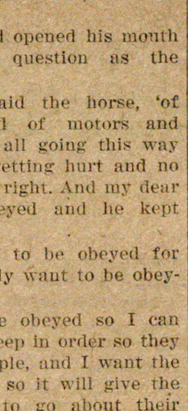
"'"That's the only reason I want to be obeyed—so I can help others and so you will be safe, quite safe."

"'The people driving motor cars got angry because they wanted to go right and the people walking got mad at those driving motor cars and there was great confusion.

"'But at last morning came and I woke up.

"'It was the first time I dreamed at night of the traffic and the work I do with the big city policeman, even though I do it every day.

"'But, of course, as I tell you, I wasn't feeling well and that is why I had this dream, and now that I feel better I know I won't have another like it.



"Ready to Ask."

"'Still it just made me think once more how fine the master is, for he doesn't care for people to obey him because he is big and strong, but because he is always looking after them and their safety.

"'That's the sort of master we have, the strong, fine master, who never gets frightened and who helps people in the big crowded city.'

"'Yes, that is the sort of a master we have,' said the little dog.

"But just at that moment the policeman came along, speaking to another policeman and he said, 'My horse is so brave and so splendid. He fears nothing and always does what I ask of him, and my dear little dog is the greatest comfort and joy in the world.' So, as you can see, they liked each other, the dog and the horse and the policeman."

Back Lame and Achy?

Don't let that bad back make you miserable. Find out what is wrong. If you suffer with a constant backache, feel lame, weak and all-played-out; have dizzy nervous spells, you may well suspect your kidneys. If kidney irregularities distress you too, you have additional proof. Don't wait! Use *Doan's Kidney Pills*, the remedy people everywhere are recommending. *Ask Your Neighbor!*

An Illinois Case

Mrs. Leland Pontius, 609 S. Crawford St., Dixon, Ill., says: "I was as helpless as a child for nearly a month. I couldn't turn in bed and would get cold sweats. My kidneys were in terrible shape. I tried different remedies but nothing gave relief. I had passed gravel stones. Doan's Kidney Pills gave me relief."

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

BAD BREATH

Often Caused by

Acid-Stomach

How can anyone with a sour, gassy stomach, who is constantly belching, has heartburn and suffers from indigestion have anything but a bad breath? All of these stomach disorders mean just one thing—**Acid-Stomach.**

EATONIC, the wonderful new stomach remedy in pleasant tasting tablet form that you eat like a bit of candy, brings quick relief from these stomach miseries. EATONIC sweetens the breath because it makes the stomach sweet, cool and comfortable. Try it for that nasty taste, congested throat and "heady feeling" after too much smoking.

If neglected, **Acid-Stomach** may cause you a lot of serious trouble. It leads to nervousness, headaches, insomnia, melancholia, rheumatism, sciatica, heart trouble, ulcer and cancer of the stomach. It makes its millions of victims weak and miserable, listless, lacking in energy, all tired out. It often brings about chronic invalidism, premature old age, a shortening of one's days.

You need the help that EATONIC can give you if you are not feeling as strong and well as you should. You will be surprised to see how much better you will feel just as soon as you begin taking this wonderful stomach remedy. Get a big 50 cent box from your druggist today. He will return your money if you are not satisfied.

Entirely Incredulous.

"I can make you young again," said the doctor."

"I don't believe it," replied Farmer Corntossel. "I used to think I was jes' as young as anybody when I was dancin' the tango up to the town hall. But it didn't amount to nothin', an' I don't believe the doctors is goin' to do any better helpin' me fool myself than the dancin' teacher did."

GOLD MUST BE TRIED BY FIRE

Gold is tried by fire, and a remedy is tried in the fires of critical health conditions. Last winter, with its enormous death rate, was a real ordeal by fire. Triner's American Elixir of Bitter Wine stood the test victoriously and won many new friends. By keeping the intestines clean, this remedy beats the bacteria out of the field; there is not the remotest chance of their nestling in the intestinal tract, and so your body is able to defy diseases. And Triner's Angelica Bitter Tonic is another excellent remedy. Mr. Ant. Klement says in his letter dated Addy, Wash., Nov. 1, 1919: "Your remedies, Triner's American Elixir of Bitter Wine and Triner's Angelica Bitter Tonic, work miracles. Two bottles have saved my daughter, and when I gave it to my neighbor who had been sick for years, he came, after two days, full of joy that he slept better and that his appetite had improved, and asked me to write at once for the remedy to Spokane." You will get these remedies at your druggist's.—Joseph Triner Company, 1333-43 S. Ashland Ave., Chicago, Ill.—Adv.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Consistent Development.

"What has become of the little boy who amused himself by placing bent pins for people to sit on?"

"He has grown up to be the man who scatters glass in the street and who laughs when a tire is punctured."

Uncle Eben.

"A man dat keeps talkin' 'bout his-self," said Uncle Eben, "sometimes surprises you by de way he manages to make a purty good speech on a mighty slim subject."

"Shallow men believe in luck; strong men believe in cause and effect."

Cuticura Soothes Baby Rashes.

That itch and burn with hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each everywhere.—Adv.

Money is not the real gauge of wealth.

OLD AGE STARTS WITH YOUR KIDNEYS

Science says that old age begins with weakened kidneys and digestive organs.

This being true, it is easy to believe that by keeping the kidneys and digestive [illegible] cleansed and in proper working order old age can be deferred and life prolonged far beyond that enjoyed by the average person.

For over 200 years GOLD MEDAL Haarlem Oil has been relieving the weaknesses and disability due to advancing years. It is a standard old-time home remedy and needs no introduction. GOLD MEDAL Haarlem Oil is inclosed in odorless, tasteless capsules containing about 5 drops each. Take them as you would a pill, with a swallow of water. The oil stimulates the kidney action and enables the organs to throw off the poisons which cause premature old age. New life and strength increase as you continue the treatment. When completely restored continue taking a capsule or two each day. GOLD MEDAL Haarlem Oil Capsules will keep you in health and vigor and prevent a return of the disease.

Do not wait until old age or disease have settled down for good. At the first sign that your kidneys are not working properly, go to your druggist and get a box of GOLD MEDAL Haarlem Oil Capsules. Money refunded if they do not help you. Three sizes. But remember to ask for the original imported GOLD MEDAL brand. In sealed packages.

GREAT SECRET OUT AT LAST

Observing Intellect Has Discovered How the Brain That Names Sleeping Cars Works.

I used to be awed, writes Inobetta, at the thought of the intellectuality of the man who names the Pullman cars. To what storehouse of classical or historical lore did this mentality have access, that he could exhume therefrom such names—names that seemed to mean something, but yet just eluded analysis? I used to think I'd like to meet that bird.

But I've pegged him at last! He's no giant intellect at all. He's just a pathological specimen—one of these wrong-font cases the medical journals have been discussing lately, whose cerebral or spinal connections seem to be crossed. Their handwriting goes from right to left—it's called "mirror writing." Their co-ordinating mechanism is constantly in reverse gear. And how do I know that the nomenclator of Pullman cars is one of these? Simply thus:

The sleeper in which I rode from Cincinnati to Atlanta the other day was named "Klimwoc!"—Cleveland Plain Dealer.

Apportioned Conversation.

"I assume that your wife generally has the last word."

"Yes," replied Mr. Meekton. "Also the first word and most of those in between."

Just Rats.

For want of a pied piper of Hamelin, the British board of agriculture is using the next best thing to get rid of rats and mice—a bill.

The house of parliament tittered when the bill was introduced, says "A Londoner." The titterers did not know that the rat has been described as the most expensive animal maintained by man. He costs in damages anything up to $200,000,000 a year—as much as the whole government subsidy to the farming industry. He spreads bubonic plague and other diseases among men and animals alike. He is of no earthly use except as a scavenger, and there the remedy is worse than the disease. The fiat has gone forth; he must be exterminated wherever he shows his head—in stacks, in granaries, in warehouses, in the holds of vessels. The mouse, too, if less harmful, is just as useless as his big relative—and the only living creature which will regret his disappearance is the cat.

Must Have Had It All.

"I understand you have had a slight operation?"

"That's what I thought I had, but I got the bill for it yesterday and I'm inclined to think now that while I was under the ether the surgeon gave me everything he had in stock."

Prepare the ground this fall for shrubs and perennials to be set out next spring.

A Health-Building Food

Grape-Nuts

A blend of wheat and barley prepared to digest easily and make and keep people strong.

"There's a Reason"

MOST IMPORTANT NEED FOR MOTOR TRUCK

Grippers Attached to Truck Gathering Potatoes in Field to Full Truck Capacity.

Comparatively few farmers could afford to purchase a motortruck just for hauling to and from the farm. Many truck manufacturers and salesmen apparently have the idea that for hauling to and from the farm is where the greatest need for the truck comes; this is simply a lack of conception of the farmer's hauling requirements.

The most important need for the truck is on the farm itself where its economy and convenience will be most felt. On most farms there are ten cases where the truck is needed for hauling about the farm to one for hauling to or from the farm. The man who now owns a tractor and motorcar should consider the possibilities of the truck as a means of still further reducing the horse and man labor requirement in his business.—Power Farming.

ELECTRIC CAR IS ADAPTED TO CITY

Periodic Recharging of Batteries Makes It Impossible to Go Long Distances.

OUTLYING STATIONS SCARCE

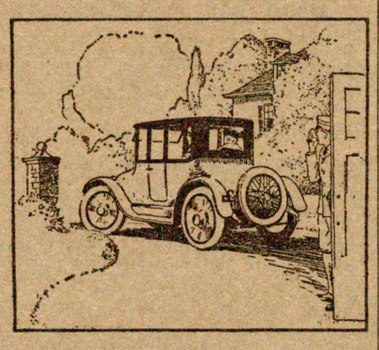
Greater Mileage Obtained From Battery Freshly Charged—Testing With Piece of Metal Common Fault—Use Voltmeter.

The electric vehicle, whether truck or pleasure, is of necessity a city machine. The periodic recharging of the storage batteries makes it impossible for the car to travel very great distances from its base of supply, for the charging stations in outlying districts are few and far between.

The construction of a battery is comparatively simple. It consists of a positive plate (of a reddish brown color) and a negative plate (of a grayish color), separated by a ribbed wood or hard rubber separator. The framework of a plate, which, in battery technique, is called a grid, consists of lead, and into this the active material is pressed. The active material is made up of red lead mixed with proper chemicals for the positive plate, and pure lead of a spongy character for the negative.

Arrangement of Plates.

A number of these plates, sufficient to give the desired amperage, are connected to their respective terminals



The Electric Car Is Only as Good as Its Battery; Take Care of It.

and put into a container or jar of hard rubber, after which dilute sulphuric acid, and distilled water is added which forms the electrolyte. The positive plate has a negative plate placed on either side of it.

The 110-ampere-hour cells, so much used on business cars, are connected in series in batteries of 40 to 45 cells to secure the full working capacity.

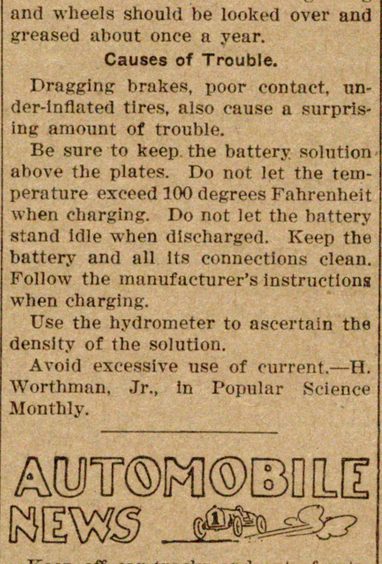
A simple explanation of a battery, when charging or discharging, is that the positive plate expels or breathes out the electrolyte on charging and soaks up or inhales it on discharging. This also explains why a battery will give greater mileage on a fresh charge, losing it when the car is left in the garage for any length of time.

The best way to ascertain the battery's condition is by the use of a hydrometer syringe. A fully charged cell will read about 1,275 to 1,300 points and a discharged cell around 1,160.

Common Testing Fault.

A common fault is to test a battery with a piece of metal, such as a wire, screwdriver, etc., getting a spark by a direct short circuit. Don't do this, for it causes the plates to buckle and crack. A voltmeter is the only instrument that can safely be used, other than a hydrometer. A cell will read about 2.2 volts on a voltmeter.

When charging a battery the electrolyte will heat up to a degree depending upon the rate of charging.



The Storage Battery Is Supposedly a Complicated Contrivance, but It's Very Simple to Understand.

This causes evaporation, and the electrolyte must be replenished with distilled water to its accustomed level.

All wiring on the car should be periodically inspected for damaged insulation, especially if acid has been spilled upon it by any mishap, for the acid eats through the wire insulation in a very short time. Bear in mind that the electrical power in a battery is limited, and everything done to conserve it will mean a saving of expense and labor. All movable contacts should be cleaned frequently, for dirt, grease, and foreign substances prevent the controller working properly and prevent good contact being made, which wastes current. The gearing and wheels should be looked over and greased about once a year.

Causes of Trouble.

Dragging brakes, poor contact, under-inflated tires, also cause a surprising amount of trouble.

Be sure to keep the battery solution above the plates. Do not let the temperature exceed 100 degrees Fahrenheit when charging. Do not let the battery stand idle when discharged. Keep the battery and all its connections clean. Follow the manufacturer's instructions when charging.

Use the hydrometer to ascertain the density of the solution.

Avoid excessive use of current.—H. Worthman, Jr., in Popular Science Monthly.

AUTOMOBILE NEWS

Keep off car tracks and out of ruts.

* * *

The motortruck on the farm is not coming. It's here.

* * *

Dim your lights when approaching another auto on the road.

OH! MY NICE HAIR IS ALL FALLING OUT

Hurry! Let "Danderine" save your hair and double its beauty.

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of delightful "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Help your hair grow long, thick and strong and become soft, glossy and abundant.—Adv.

Something to Boast Of.

"I'm not bragging or anything."

"Yes, yes, go on."

"But I do want to say that I have been a landlord for 17 years and in all that time I haven't had a single complaint filed against me by a tenant."

FLU CAUSED PRESIDENT WILSON'S SICKNESS

Physicians claim that President Wilson is suffering from neurasthenia or nervous exhaustion. This, they claim, is the after effect of an attack of influenza which he had last April, while he was in Paris attending the Peace conference. There are hundreds of thousands of people today who are still suffering some bad effect from last year's attack of influenza.

Doctors are agreed that the Flu is coming back this Fall, and now that cooler weather is here, they are afraid it will break out any time. Even if one recovers from the Flu, the after effects are terrible. The only sane thing to do is to prevent the Flu.

Influenza can be prevented; last year's results prove that. As a preventive for Flu, Turpo has been a pronounced success. Turpo is an effective germicide, combining the old-fashioned remedies of turpentine (which has always been known as the best home germicide), camphor and menthol in a pure mineral base. These ingredients have long been recognized as effective germicides, as well as having really wonderful qualities in relieving colds and congestions. Snuff a little Turpo up the nostrils several times a day, and the Flu germs will have little chance of getting a lodging and breeding place. Many physicians and hospitals use and recommend Turpo.

The fact that there have been cases of "flu" already reported makes it important that you prepare now. Buy a thirty cent jar of Turpo, while your druggist has a supply on hand, and use as directed. Last year druggists could not supply the demand. Remember that Turpo is a preventive, not a cure for influenza. Take care of yourself.—Adv.

Harnessing the Torrents.

In Switzerland almost every mountain torrent has its electric plant, the current often being carried for many miles for lighting and power purposes.

GREEN'S AUGUST FLOWER.

Stop a minute and think what it means to say that "Green's August Flower has been a household remedy all over the civilized world for more than half a century." No higher praise is possible and no better remedy can be found for constipation, intestinal troubles, torpid liver and the depressed feeling that accompanies such disorders. It is most valuable for indigestion or nervous dyspepsia and liver trouble, coming up of food, palpitation of heart, and many other symptoms. A few doses of August Flower will relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.—Adv.

Faith and ingenuity often take the place of the hired man.

When Nervous and Rundown

Advance, Ill.—"After a hard and serious illness I was restored to a perfectly healthy condition through Dr. Pierce's Favorite Prescription which I took as a tonic. It proved to be such a splendid tonic that I have taken it many times since then, whenever I have been nervous and run-down, and it has never failed to strengthen and build me up in health.

"I can also speak just as highly of the 'Golden Medical Discovery' as a blood purifier and a medicine that is safe to give to little children. When one of my daughters was only a year old she had scrofulous sores all over her head. I gave her Dr. Pierce's Golden Medical Discovery and it healed up every blemish and her hair grew nice and thick. She has grown to womanhood and has never had any return of blood disorder of any sort since that time. I give the 'Discovery' all the credit due it for this cure and take pleasure in recommending it."—Mrs. Etta Lewis, care Mrs. P. M. Roberts, R. R. 1, Box 31.

Quincy, Ill.—"I am glad to tell what Dr. Pierce's Anuric (for the kidneys) has done for me; it is a fine remedy. I had been a great sufferer with my back and hip for years, but 'Anuric' did wonders for me. I have taken two small bottles and now tell every one what a good medicine it is."—Mrs. Stella Steckdall, 1532 Jefferson St.

All women who suffer from feminine disorders are invited to write the Faculty of the Invalids' Hotel, Buffalo, N. Y., for free confidential consultation and advice, no charge being made for this high professional service. This will enable every woman to benefit by the advice of the distinguished physicians.

International Courtesy.

Foreign vessels entering United States ports are obliged to display only the flag of the country to which they belong. It is customary, however, for steamers to carry the United States flag at the forepeak when entering United States ports, but this is merely a matter of international courtesy and is not compulsory.

Daily Thought.

The wisest saying of all was that the only true wisdom lay in not thinking that one knew what one did not know.—Cicero.

Suggestive Sign.

Railway stations in Sweden at which meals are served are indicated by the simple but suggestive picture of a crossed knife and fork opposite to the name of the station in the time table.

Daily Thought.

He holds much who holds his tongue.—Sancho Panza.

Frankfort

TAKE ROAD JOB.

Voss and Yunker of Frankfort township have taken a road job in Green Garden for building a mile of hard road. Work has been going on this job the past week.

Frankfort merchants are strictly enforcing the new egg law relative to fresh eggs. Farmers who have packed eggs during the summer with the expectation of selling them for fresh eggs this winter are finding themselves up against a snag as they cannot get fresh egg prices for those kind of eggs, but can only get the prices paid for seconds.

This week will witness a large number of auction sales in this section. William Lankenau, president of the Frankfort State bank, will clerk at a number of these sales.

William Deist, it is understood, has rented the Andrew Hall farm for the ensuing year.

Christ Felton and family of Chicago were week-end guests at the home of Mr. and Mrs. George Hasenjager.

The Frankfort camp of the M. W. A. will meet the first Tuesday in December at which time the annual election of officers will be held.

Mrs. Thomas Collier, who has been ill and confined to bed with an attack of diabetes for the past four weeks is slightly improved.

Miss Ruby Collier is taking treatment in Chicago for a case of blood poisoning caused through some infection in dental work.

An official board meeting of the Frankfort Methodist church was held Friday evening at the home of Levi Doty.

The Frankfort Epworth league was entertained Friday evening at the home of Mrs. Walter Pfaff. The regular monthly social followed the business session.

The Ladies' Aid society of the Methodist church will hold their monthly meeting the first week in December.

Frankfort has been having difficulty in getting coal released from the railroads. The past week the local coal dealers have obtained releases and the coal has been started moving.

TAKES UP TANNING AGENCY.

William T. Folkers has taken up the local agency for the Ede Tanning company of Dubuque, Ia. This company guarantees their tanning for life. Mr. Folkers first opened up the agency Saturday and has received a number of orders for various kinds of tanning and kinds of furs, hides, etc., are accepted to be made up into various pretty and useful articles, such as coats, robes, etc.

INTERESTED IN BANK FAILURE

Frankfort is much interested in the bank crash at Crete the past week. August Kracke, the missing cashier, is personally known by a number of Frankfort people. When the news reached here Saturday morning it created quite a stir. This affair recalled the exciting times Frankfort experienced some year ago in the Parker bank failure.

I BUILD
ANYTHING
ANYWHERE

J. R. BOWEN,- New Lenox

Tinley Park

The new bridge, which is under course of construction at the new road opened at Oak Forest, is nearing completion. This new road is greatly used by the residents in the new subdivisions at Oak Forest. A good number of Chicago people have purchased lot and built homes at Oak Forest. A Chicago real estate concern has laid out the land into lots up to the William Steele place. It is proposed to open a park in one of the subdivisions, the park to be known as Arbor park. This is proposed for next year.

William F. Koehler, one of Tinley Park's well-to-do and well-known residents, has entered the local real estate field with a rush. He has purchased the old Bodimer property the past week which he has added to his other real estate holdings on the South side. Mr. Koehler believes in seeing something doing in the old town.

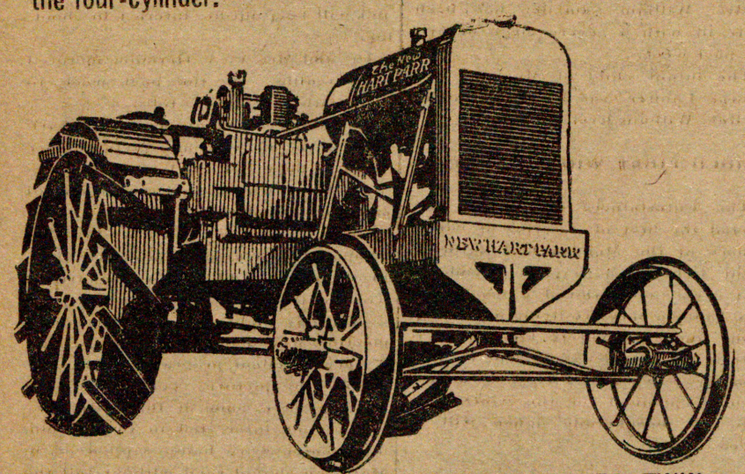
A Tractor with two-cylinder twin motor leads them all

At the first big demonstration of 1919 held by the Ohio State University, Columbus, Ohio, Hart-Parr 30 deve'oped more horse power than any other three-plow tractor among the 22 competing, and it had but one close competitor for fuel economy.

We have been building tractor motors for over eighteen years; in fact, we built the first successful kerosene motor.

In our experience we have found that the two-cylinder twin kerosene motor for a tractor has 20 distinct advantages over the four-cylinder.



ADVANTAGES OF HART-PARR 30 TWO-CYLINDER TWIN MOTOR

1. Less engine experience needed to operate.
2. Handles kerosene better.
3. More accessible.
4. Lower cost per horsepower.
5. Half the ignition trouble.
6. Half the valve trouble.
7. Only two main bearings. Cannot get out of line and break crank shaft.
8. Few bearings, and these may be oiled by mechanical oiler.
9. Less gearing because of lower engine speed and less reduction.
10. Best type of gearing may be used because of less reduction to wheels.
11. Less power lost in transmission.
12. Less jacket walls on cylinder, hence more uniform cooling.
13. Easier to cool with radiator.
14. Sturdier, more rugged parts.
15. Slower speed, hence longer life.
16. Less wearing parts.
17. Heavy duty engines have always been one or two cylinders.
18. With cranks at 180 degrees, they may be very well balanced.
19. Similar to stationary engine,
20. Better belt power.

SPECIFICATIONS

Power—Pulls three plows—30 H. P. on belt.
Motor — 2-cylinder twin, 4 cycle. Valve in head. 750 R. P. M.
Tractor Frame—Cast steel, one piece. No bend, no twist.
Carburetor—Dray kerosene shunt.
Bearings—S. K. F. Ball and Hyatt Roller.
Speeds—Two forward; one reverse.
Transmission—Selective sliding gear.
Cooling Device—Honeycomb radiator —shaft driven pump and fan.
Lubrication—Fresh oil, force feed.
Weight—5,158 lbs.

Price—$1,395 f. o. b. factory.

A kerosene engine running on full load produces more power on cold fuel because all the expansion takes place in the combustion chamber. At light load the engine runs more smoothly on hot fuel mixture.

The Dray Kerosene Shunt automatically feeds cold fuel on full load and hot fuel on light load, giving plenty of power when needed and a smooth running engine at all loads.

This is the reason for the economical, flexible power of the Hart-Parr 30.

BOX SOCIAL BIG SUCCESS.

The box social which was directed at the Mokena public school Friday night was a huge success. A good-sized crowd was present. The lunch boxes were auctioned and brought fancy prices. The bidding was quite spirited and keen. The total receipts of the evening came to $50.

GROTH-KLOSE NUPTIALS.

A surprise was sprung last Wednesday on the many friends of Miss Laurabelle Klose of Mokena and Mr. Edward Groth, when they journeyed to Joliet and were united in marriage at the rectory of the Christ Episcopal church, Rev. T. DeWitt Tanner officiating.

Miss Klose and Lieut. Groth have been friends for many years, and although their many friends had suspected their path would eventually lead to the altar, few had any inkling when the affair was to take place. Miss Klose is the daugter of Mr. and Mrs. O. J. Klose of Mokena. Lieut. Groth recently returned from overseas, where he had served with the American expeditionary forces. Lieut. and Mrs. Groth will reside in Chicago.

BAZAAR NETS WELL.

The bazaar and supper directed by the Ladies' Aid society of the Immanuel Lutheran church at the church parlors Thursday night drew a good-sized crowd. Everything sold well and commanded good prices. The supper was exceptionally well patronized. The receipts netted $300.

Frank Whalen of Joliet, representing the Chicago Telephone Co., has been busy canvassing this section for new subscribers to this telephone. At present there is a free service between New Lenox and Mokena.

New Lenox

New Lenox, Nov. 27.—The big drive which has been on all over the county the past week has resulted in stirring up a great deal of interest among the farmers in the national association of farmers, which is being worked for now.

New Lenox township farmers are not slow in seeing the big advantages which will accrue to all farmers who join the new association. Last Tuesday state and county workers, assisted by Howard Francis, local chairman, made a drive for memberships in New Lenox township. A number of autos were pressed into service and a tour of the township was quickly made. A goodly number of farmers enrolled as members of the new organization. Much interest has been created in the movement here and big results are anticipated.

HOME IMPROVEMENT CLUB.

The New Lenox Home Improvement club was entertained Wednesday at the home of Mrs. Fred Francis. About ttwenty-nine guests were present. An excellent program was rendered. Mrs. Harlow Gougar gave a reading. Mrs. Francis was assisted in entertaining by Mrs. Henry Craven and Mrs. Harlow Francis.

MISSIONARY SOCIETY MEETS.

The Women's Missionary society of the Methodist church was entertained Friday afternoon at the home of Mrs. John Spuehler, with Mrs. Henry Craven, Mrs. G. L. Gilman and Mrs. Chas. Francis assisting hostesses.

Mrs. H. N. Dickinson had charge of the study on "Christian Americanization," which is quite an absorbing topic.

Mrs. George Francis had charge of the devotionals.

The meeting of the Ladies' Aid society was combined with this meeting. A report from the finance committee was read showing that the recent bazaar cleared $297, which was far beyond the expectations of the ladies.

The rooms were prettily decorated with chrysanthemums. Refreshments were served at the close of the business session.

PREPARING FOR XMAS.

The Sunday school pupils of the Methodist church are preparing for their annual Christmas program. Rehearsals will be held for the first time Friday evening of this week. A cantata will be given this year.

CARD PARTY BIG AFFAIR.

The card party, directed by the Ladies of the Grace Episcopal church Saturday night, was a big success in every way. Fourteen tables played. The attendance was exceptionally good.

The New Lenox camp of the Royal Neighbors will direct a card party at Grange hall Saturday night, Dec. 6.

Mr. and Mrs. H. N. Dickinson leave this week for Los Angeles, Cal., where they will spend the winter.

Mr. and Mrs. Fred Francis entertained a company of relatives at a Thanksgiving dinner Thursday.

TO WINTER IN FLORIDA.

Miss R. Strassenberg of Blue Island left November 28 for Tarpon Springs, Fla., where she will spend the winter.

New Wax From South America.

A wax used for candles in Colombia, as yet unknown to the outside world, is obtained from the leaves of the wax palm of the Andes. It has a melting point as high as 93 degrees Cent., while that of carnauba wax from Brazil is 84 degrees, and that of candelila wax from Mexico is only about 70 degrees.

The Erie Canal.

On the 26th of October, 1825, the Erie canal, connecting Lake Erie and the Hudson river, was opened. The event was announced by the firing of cannon at short intervals along the entire length. The canal, begun at Rome, N. Y., in 1817, was completed chiefly through the influence of DeWitt Clinton. The cost of construction was $7,602,000.

First Opera in England.

In 1656 there was produced "The Siege of Rhodes: Made a Representation by the Art of Perspectives in Scenes and the story sung in recitative Musick," which a writer in the Dictionary of National Biography characterized as "in some respects the most epoch-making play in the language." It was virtually the first opera produced in England.

How Would You Like It?

Preparatory to giving the elephant in captivity his bath his body is gone over entirely with a sheet of sandpaper.

Education.

An educated man stands, as it were, in the midst of a boundless arsenal and magazine, filled with all the weapons and engines which the skill of men has been able to devise from the earliest time; and he works accordingly, with a strength borrowed from all past ages.—Carlyle.

Using a Doorway.

The unused doorway makes an effective bookcase. The door should be locked and treated as the back of the case. Shelves can be set in the entire door space or the lower half.

Gets Its Own Drink.

A South American orchid lets down a tube and drinks when it needs water, then coils it on top of the plant when not in use.

Keep Money From the Heart.

Money in the hand is a good thing if it isn't allowed to get into the heart. If it is only in the hand it is kept in circulation; if allowed to get into the heart it is hoarded away.

Sources of Happiness.

The world contains not one single object that might not be a source of happiness. Sorrow springs from this, that man outdoes himself in misusing everything. He turns against his own body or his own spirit all sorts of things that seem well made for his joy.—Georges Duhamel in the Century Magazine.

Here's a Genius.

Adv.—"I offer my services to the Public as Literary Writer on all subjects, whether sollum or joyfull. Alsoe, Obituarst, giving Departed Friends Glorious welcome to the Hairafter."—Boston Transcript.

Must Work Together.

Human beings were made to succeed and to be happy when they work together on the "each for all and all for each" basis. Put them together any other way and they won't get on at all.

Safe.

Mrs. Green—"So your husband is in trouble again?" Mrs. Jones—"Oh, no! He is out of trouble now. He's in jail."

PROPER STORAGE FOR VEGETABLES

Source of Good Income to Farmer Living Near Good Sized Towns or Cities.

BEST PLACE FOR PRODUCTS

Motor Truck Makes It Possible for Farmer to Get Vegetables to Consumer in Cold Weather—Outdoor Cellars Best.

(Prepared by the United States Department of Agriculture.)

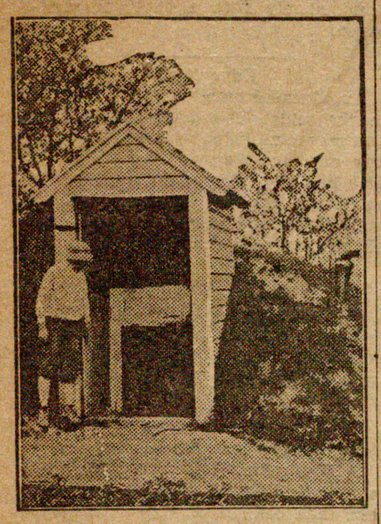
If properly stored after harvest, vegetables can be made a source of considerable income to the farmer who is located near good sized towns or cities. In such places a constantly increasing number of people are living in apartments and flats, where they have storage facilities for only small quantities of vegetables, or in houses heated by furnaces in the basement, making that part of the house too warm for the storage of vegetables. The automobile or motor truck has made it possible for the grower to get his vegetables to the dealer or consumer even in cold weather, especially if his machine is inclosed or is fitted with a heater.

Must Be Well Stored.

Proper storage of the vegetables from harvest time until they are brought out for sale is a subject to which the grower must give particular attention, for on it the entire success of a winter-marketing program depends.

Where the grower plans to draw on his stock from time to time during the cold weather he must so store his produce that portions of it can be removed without disturbing the remainder. Instead of putting all of one kind of vegetables in one pile it is advisable to make several smaller piles or to use various containers, such as boxes, barrels or baskets, each of which is adequately protected and can be removed with its contents without disturbing other stores. Where outdoor pits are used it may be desirable to introduce intervening walls or layers of earth at more frequent intervals than would be necessary in storing supplies merely for one family.

Beets, late cabbage, carrots, celery, onions, parsnips, potatoes, sweet potatoes, salsify, and turnips may be stored in their natural condition. Beans of various kinds, including the limas, may be stored dry. Good storage facilities exist in most farm houses, it being only necessary to make use of the cellar, the attic, or other parts of the dwelling, depending upon



An Outdoor Storage Cellar, Built Partly Underground, for Storing Garden Vegetables. It Is Built of Concrete Except the Entrance, Which Is Frame, and Is Frost Proof. Where the Cold Is Not Severe Less Protection Than Is Shown Here Is Needed.

the character and amount of produce to be stored. Barrels, crates, boxes or bins may be used as containers for various vegetables, but movable containers are preferable to built-in bins because they are more easily cleaned. Outdoor storage cellars or caves are particularly desirable, for larger quantities can be taken care of in convenient and inexpensive fashion.

Protecting by Insulation.

In sections where low temperatures prevail it is necessary to insulate the storage cellar or house so that the vegetables will not freeze. The above-ground type of house much used in many sections of the North, has thick walls filled with sawdust or shavings. It is necessary that pains be taken to provide for proper ventilation. In many northern sections large storage cellars are built partly underground. Concrete storage cellars are coming into quite general use. Outdoor banks and pits are also familiar means employed to protect vegetables in cold weather. The conical pit is used commonly for such vegetables as potatoes, carrots, beets, turnips, salsify, parsnips, and heads of cabbage. The bureau of plant industry has issued a Farmers' Bulletin, No. 879, which gives detailed instructions regarding the construction of these storage places.

All vegetables which the farmer or truck raiser may desire to keep in stock for selling through the winter months do not require the same type of storage.

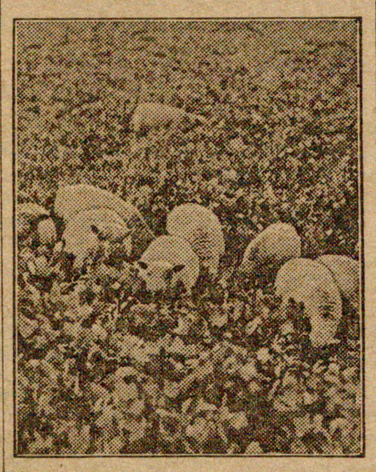
GRADUALLY ACCUSTOM LAMBS TO RICH FEED

Animals for Fattening Are Put on Dry Pasture.

After Two or Three Days They Are Turned Into Cornfield—Shelter of Some Kind Is Advisable—Provide Plenty Water.

Lambs bought on the market for fattening must be accustomed gradually to rich green feed like rape, soybeans or cowpeas, says the University of Missouri College of Agriculture. The method commonly used by successful feeders is to put the lambs on a comparatively dry timothy or bluegrass pasture upon arrival at the farm. Here they are allowed to rest and fill up on grass for a couple of days. An abundance of good clean drinking water should be provided at all times. After a day or two the lambs are turned into the cornfield for about an hour, following their morning fill of grass. They are then returned to the bluegrass or timothy pasture. This operation is repeated for three or four days, and the time the lambs are allowed in the cornfield is increased about an hour each day.

It is not easy to drive a load or two of lambs out of a large cornfield, and



Some Grain Is Essential in Addition to Forage in Fattening Lambs for Market.

there is always the danger of leaving behind a few which have strayed from the main flock. To avoid this trouble, fence off "sheep tight" a plot of two or three acres. In this plot grow forage to be used gradually to accustom the lambs to their regular forage in the larger field. This plan will be found very convenient.

The lambs will eat the lower blades of the corn and will learn to eat the "down" corn. However, they will not become troublesome by breaking down the stalks in order to get to the ears, if sufficient food is provided. If it is desirable to pasture off the grain instead of husking out the corn, it will be necessary for best results to break the stalks for the lambs. Just enough stalks should be broken each day to furnish grain to satisfy the lambs. If too much is broken down at one time it will be wasted.

"No one ever made sheep fat by stinting them." It should be remembered that as the fall season advances, feed becomes scarce and unpalatable. If the lambs are to be marketed as fat lambs they should not be forced to remain in the cornfield too long without some additional feed. This is particularly true where rape is not available. It is necessary about November 1 to begin feeding some grain in addition to the forage. Many feeders also feed hay at this time, giving the lambs each evening as much as they will eat before morning. A few of the larger feeders begin feeding corn silage about November 1. As much silage as the lambs will eat up clean in about an hour, is the right amount to feed both morning and evening.

Provide plenty of salt and good water. Shed or barn shelter is not absolutely necessary, but it is advisable to have shelter to protect the lambs from the cold fall rains.

POULTRY SUFFER FOR WATER

Lack Is Detrimental to Health and Has Indirect Bearing on Productivity.

Allowing fowls to suffer, even for short periods, for the want of water is not only detrimental to robust health, but has an indirect bearing on productivity. Green food in variety is beneficial not only because it helps slake thirst, but for its mineral salts and its feeding value as roughage. For this reason it should be fed in liberal quantities, and pure water should not only be always available, but in full measure. Both stand for health and productive values.

WINTER SHELTER FOR SWINE

Farmer Cannot Expect to Realize Big Profit From Animals Exposed to Rain and Cold.

The time is past when we can expect to leave our hogs unsheltered during the late fall and early winter rains and expect to realize the best results from feeding them. The thick layers of fat may be a protection but they are no insurance against pneumonia and kindred ailments. The hog is not protected by a thick coat of hair as are the other animals and he is more in contact with the damp cold soil underfoot.

BIG AMOUNT OF BARRELED APPLES REACH MARKET EACH FALL IMPAIRED IN QUALITY

An Apple Sizer and Grader in Operation.

(Prepared by the United States Department of Agriculture.)

With a view to meeting the needs of apple growers in the East, middle West and elsewhere who have not placed their business on the most profitable basis, the bureau of markets has just published Farmers' Bulletin No. 1080, "Preparation of Barreled Apples for the Market." The apple crop in a majority of the states is shipped in barrels.

A large amount of the barreled fruit reaching the market each season is impaired in quality by being picked at the wrong stage of maturity, either too early or too late. The grower must realize that fruit is not ready to be picked when it clings to the spurs so tightly that the spurs are pulled out or broken. Furthermore, the color of fruit, which eventually turns red, is not always a reliable index, the intensity of the color being dependent upon the prevailing cloudiness or brightness of the weather. Whether or not the red color develops normally, a reliable indication of maturity is a ground color which, when the fruit is ready for picking, should be turning from clear green to a whitish green or greenish yellow. Yellow, green and russet varieties of apples are generally ready to pick when they have attained the proper size and the stems separate readily from the spurs. In picking apples, the stem should be separated from the spur either by giving the fruit a slight rotating motion combined with a sharp upward twist or by exerting a slight pressure with the thumb or forefinger at the joint of the stem and spur just as the fruit is pulled.

A variety of picking utensils are commented on in the bulletin, some of which are mentioned for special approval. In removing the crop it is generally advantageous to use both sacks and baskets, as the latter are especially convenient for gathering fruit near the ground, while the sacks can be used to advantage for ladder work, as the pickers have both hands free. The chief disadvantage of sacks is that their use involves a greater possibility of bruising the fruit. In emptying either the basket or the sack, care should be taken to avoid dropping the fruit. If a basket is used, it should be lowered to the bottom of the lug box or other receptacle and inverted gently. A certain type of sack is constructed with a drop bottom, so that the fruit can be emptied without bruising it.

Ladders Make or Mar.

Much efficiency in picking depends on the use of ladders of the proper type. Several varieties are in common use. Step-ladders are especially satisfactory for work in small trees and in picking from the lower branches of larger trees. The most desirable types are wide and flaring at the bottom, narrow at the top and supported with but one prop. As a rule, not enough consideration is given to the selection of ladders.

Where the crop is packed over tables that are moved about the orchard the packers usually carry the fruit in the picking utensil to the packing table. While it is common practice for the pickers to do this, it should be avoided by assigning certain members of the crew to this task. They should also furnish the pickers with empty receptacles as needed.

Use of Sorting Tables.

Two types of grading or sorting tables are used almost exclusively where the fruit is graded in the orchard, and they are used to a large extent in packing houses. These are the apron table and the canvas or burlap table. The apron table or a variation of this type is commonly used in all sections. The bed, which is slatted, so that trash falls through it, is inclined, causing the fruit as it is graded to roll to the lower end, where on opening a stop or drop it is lowered by means of an apron into the barrel. While work can be done rather rapidly with this table, it is not altogether satisfactory, as the fruit frequently crowds past the sorters and permits carelessness on their part. The canvas or burlap table is made with a piece of this material stretched over a rectangular frame, and is not fitted for running the fruit from the apron into the barrel. The apples must be sorted by hand into baskets in which they are lowered into barrels. The advantage of this is that all apples are subject to careful inspection.

Sizing machines for barrel apples are gaining popularity. They have been used in the Northwest for several years for sizing boxed apples, but operate on a different principle than that employed in barreled apple-sizing machines. At present sizing machines are being used quite extensively for barrel packing in all sections to meet the demand for apples of uniform size. The most common practice throughout the barrel apple sections is to separate the fruit into two standard sizes, 2¼ to 2½ inches and 2½ inches and larger. There are a variety of machines employed to do this work, each featuring some distinctive mechanical device or sorting process. In general, any of these will size apples satisfactorily for barrel packing. In making a selection, the apple grower must determine which machine has a capacity proportionate to the size of his orchard and can be operated most economically. He should also look for one of simple design and free from features requiring too much adjustment, and should make sure that it will not bruise the fruit. The durability of the machine should also be considered. The various methods of feeding the fruit to the sizing machine should also be studied carefully, as it influences directly the total daily output and consequently the cost of operation. Only small machines can be operated by hand power. Some of the simplest types having a capacity of perhaps 100 barrels a day can be run in this way, but in most cases the gasoline engine or electric motor is preferable.

The apple grower raising any considerable quantity of fruit should give careful attention to the advantages of mechanical conveyors, which save much labor both in handling loose fruit and light packages.

Operation of Grading Laws.

The enactment of grading laws for apples is a comparatively recent development. The present federal law, known as the Sulzer law, took effect July 1, 1913, and at about the same time a number of states also passed laws. For several seasons the state laws have not been entirely successful in obtaining results desired. Many were enacted hurriedly, and most of them contained provisions not consistent with commercial practices. The degree of enforcement in different states has varied markedly. Furthermore, fruit from many of the states having these state laws frequently appears in the same markets and the use of identical grade terms having different meanings in different states has in a way defeated the purpose of the law. In spite of these objections, however, a state law that is practical in its specifications and intelligently enforced will carry with it many advantages.

The grower who feels the need of a packing house will find suggestions in the section of the bulletin devoted to designs of such buildings. Floor plans of various types are suggested.

One provides for an output of 200 barrels a day, and a second plan shows a house equipped with three grading machines having a total capacity of 1,200 barrels a day. A third plan provides for an output from two machines with a total capacity of 100 barrels a day.

Partial suggestions relating to hauling concludes the bulletin. As a large part of the barrel crop of the country is packed in the orchard, it is necessary to haul the packed fruit from two to fifteen miles. Under many conditions, especially where roads are favorable, motortrucks are best suited for this work. The farm wagon most commonly used is equipped with either an ordinary wagon bed or a three-pole frame, and has a capacity of 15 barrels. Both types of wagon should be equipped with springs, preferably bolster springs, for careful handling of the packed fruit is quite as important as care in the packing operations.

FEED FOWLS SCRATCH GRAIN

Proper Amount Specified by Specialists for Leghorns and General Purpose Breeds.

(Prepared by the United States Department of Agriculture.)

Specialists of the United States department of agriculture advise poultry keepers to feed about one quart of scratch grain and an equal weight of mash (about 1½ quarts) daily to 13 hens of the general purpose breeds, such as the Plymouth Rocks, Rhode Island Reds or Wyandottes, or about 16 hens of the smaller or egg breeds. This would be about 7½ pounds each of scratch grains and of mash daily to

Fowls Having Free Range Pick Up Much of Their Feed.

100 Leghorns and about 9½ pounds of each to 100 general purpose fowls. If hens have free range or large yards containing green feed a general purpose hen will eat about 75 pounds of feed in a year, while a Leghorn will consume about 55 pounds in addition to the green stuff which she eats.

EPSOM SALTS FOR CHICKENS

Many Digestive Troubles May Be Overcome by Purging or Cleansing the Intestines.

A great many chickens suffer from indigestion or digestive troubles, which may be due to improper feeding or some method of management. It has been found that many of these conditions may be overcome by purging or cleansing the intestines through some means of a laxative. One of the cheapest and easiest handled laxatives is epsom salts, which can be purchased at any drug store. For mature fowls the dosage is one-half teaspoonful per bird though if the case is minor, one-third teaspoonful may be sufficient. An easy and effective way of administering this is to mix it with a dry mash of bran and shorts, using the above proportions and afterwards moistening it with water.

CURE FOR POULTRY DISEASES

Use of Vaccine Has Considerable Value in Correcting Ailments, Says Professor Lewis.

Prof. Harry R. Lewis of New Jersey college before a recent meeting at the Connecticut station said the use of vaccine in the cure of poultry diseases has considerable value. Professor Lewis told of trying out a vaccine on hens afflicted with chicken pox and roup and the successful results. He believes that other diseases may be treated by the vaccine plan. The next step at the New Jersey station will be an effort to immunize pullets against chicken pox or roup by vaccinating while young and before they have been exposed to the disease.

Watch your flock carefully and as soon as one member shows disease remove it.

* * *

It is easy to keep your hens healthy if you know the laws of health and practice them.

* * *

Close confinement without exercise is not conducive to the best results in the poultry yard.

* * *

Geese are not like hens. Old geese lay better than young geese and old ganders are better than young ones.

* * *

The weather is something, but the hen is more. Have your hens in a laying condition and they will lay in spite of weather.

* * *

The dust bath is recommended highly for farm flocks but it should not be the only means of preventing lice as some birds will not dust themselves thoroughly.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well.

"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Sometimes there are serious conditions where a hospital operation is the only alternative, but on the other hand so many women have been cured by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, after doctors have said that an operation was necessary—every woman who wants to avoid an operation should give it a fair trial before submitting to such a trying ordeal.

If complications exist, write to Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years experience is at your service.

Who Does?

"Here's a man who claims that a knowledge of Greek and Latin is necessary in order to write English correctly."

"But nowadays who considers it necessary to write English correctly?"—Merritt Dispatch.

BREAKS YOUR COLD IN JUST A FEW HOURS

"Pape's Cold Compound" instantly relieves stuffiness and distress

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a severe cold and ends all grippe misery.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, contains no quinine—Insist upon Pape's!—Adv.

A Sure Bet.

"How did you make out at the race-track yesterday?"

"Fine, I didn't go."

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Most people have little use for a "knocker," yet pounding the iron gives it new character.

TORPEDOED!

Don't blast your Liver and Bowels, but take "Cascarets."

You men and women who can't get feeling right—who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are bilious, nervous and upset, bothered with a sick, gassy, disordered stomach and colds.

Are you keeping your liver and bowels clean with Cascarets, or shocking your insides every few days with Calomel, Salts, Oil and violent pills?

Cascarets work while you sleep; they cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels. Cascarets never gripe, sicken or cause inconvenience and Cascarets cost so little too.—Adv.

A man who courts and runs away may be hauled to court some day.

Stop Your Coughing

No need to let that cough persist. Stop the irritation, and remove tickling and hoarseness by soothing the inflamed throat with

PISO'S

THE KITCHEN CABINET

My friend, have you heard of the city "Yawn"
On the banks of the river "Slow."
Where blooms the "Wait-a-While" flower fair
Where the "Some-Time-Or-Other" scents the air
And the soft "Go-Easys" grow?

It lies in the valley of "What's the Use"
In the province of "Let'er Slide"
That "Tired Feeling" is native there
It's the home of the listless "I Don't Care"
Where the "Put It Offs" abide.

DISHES WITHOUT MEAT.

Peanuts are the cheapest form of nut protein if purchased in large quantities. A nut loaf if well seasoned makes a very wholesome dish.

Nut Loaf—Take one and one-half cupfuls of mixed ground nuts, two cupfuls of bread crumbs, one egg, one teaspoonful of poultry dressing, one tablespoonful of minced onion, one cupful of milk, one and one-half teaspoonfuls of salt, a few dashes of pepper and a half cupful of hot water with a half teaspoonful of beef extract. Mix thoroughly and stand for twenty minutes, then pack into a bread pan, brush with corn oil and bake in a moderate oven.

Nut and Bean Sausage.—Take one cupful of cooked beans, one cupful of finely ground peanuts, one cupful of cooked rice, one cupful of finely ground peanuts, one cupful of cooked rice, one cupful of bread crumbs, two tablespoonfuls of minced parsley, one teaspoonful of salt, one teaspoonful of sage, one-fourth teaspoonful of pepper, and one-half cupful of milk. Mix well, form in flat cakes, roll in finely ground peanuts or peanut flour, and fry in vegetable fat.

Vegetable Cutlets.—Take two cupfuls of cooked, sifted squash or mashed parsnips, two-thirds of a cupful of bread crumbs, one beaten egg, half a tablespoonful of fat, one and one-half cupfuls of coarsely ground black walnut meats. Season with salt and pepper and shape into cutlets. Fry in hot vegetable fat and serve with a white sauce and minced green pepper.

Peanut and Sweet Potato Cakes.—Combine the following ingredients in the order given: three cupfuls of mashed seasoned sweet potatoes, one tablespoonful of peanut butter, one tablespoonful of sweet fat; one egg and one and one-half cupfuls of ground peanuts with a bit of sage. Shape into flat cakes and fry as usual. Serve with baked apples or tart apple sauce.

A handful of walnut meats, an apple or two or a pear, with a bread and butter sandwich and a glass of milk, furnishes a well balanced meal sufficiently nourishing for the average adult.

Self condemnation with is allied thoughts and emotions has been productive of far greater loss in initiative, in will-power, and of far greater degree of lowered vitality, both mental and physical, than any of us have perhaps realized.

WHAT SHALL WE HAVE TO EAT?

The daily question in twenty million homes, is "what shall we have for dinner?" and those who are responsible for the health and happiness of the individuals in these homes, find it necessary to do much thinking if they avoid a monotony in diet.

Tomato Soup. — A simple tomato soup which is easily and quickly prepared: Put four tablespoonfuls of butter in a saucepan, when melted and bubbling hot add four tablespoonfuls of flour, cook until smooth, then add one cupful of milk and one cupful of strained tomato with a pinch of soda. Season with salt and pepper and serve at once.

Brown Stew.—Take three or four pounds of the shoulder of beef, with a generous piece of suet. Try out the suet and fry in it, one or two small chopped onions and a medium sized carrot also chopped; add the meat and turn until well browned on both sides; season with salt and pepper, add water and simmer for three or four hours until tender. A half hour before ready to serve add a few small-sized potatoes to the stew and brown them by basting occasionally.

Tapioca and Pears.—Bake a dish of tapioca with canned pears and juice, adding a bit of butter and a grating of lemon if desired. Serve with a slightly thickened sauce made from the pear juice, or whipped cream and sugar may be used if preferred.

Peas, Pickles and Peanut Sandwiches.—Chop a few sour pickles, add a cupful of cooked peas, add a handful of minced peanuts. Arrange on slices of orange, garnish with parsley and serve with a boiled dressing.

Boiled Dressing.—Take equal parts of well beaten eggs and vinegar and cook in a double boiler until thick. For a vegetable salad, mix equal parts of dressing and whipped cream; for a fruit salad use one part dressing and three parts cream, with the proper seasonings.

Drink less and breathe more
Eat less and chew more,
Waste less and save more,
Preach less and do more.

ECONOMICAL MEAT DISHES.

In these days a dish which tastes good, is satisfying and at the same time reasonable in price, needs no other recommendation.

Mock Terrapin. — Cut cooked calf's liver into dice. Put a tablespoonful of butter into a saucepan, add salt, pepper and paprika and cook until the butter is slightly brown, then add two tablespoonfuls of flour and enough beef stock made by using beef extract and water to make a moderately thick sauce. Add a little chopped parsley, half a cupful of cream, two hard cooked eggs cut fine, a tablespoonful of lemon juice and the liver. Cook until the liver is heated through, add two tablespoonfuls of jelly or any canned fruit juice and serve at once on buttered toast.

Escalloped Veal with Potato.—Mince cold cooked veal very fine. Butter a baking dish and put a thin layer of veal on the bottom, sprinkle with chopped onion and cover with a layer of seasoned mashed potato, add another layer of veal, onion and seasonings and cover with potato. Add milk to moisten, cover and bake until thoroughly heated. Remove the cover and brown.

Beef Olives.—Take slices of rare roast beef and roll each around a thin slice of bacon which has been fried until transparent but not crisp. Tie and boil rapidly for five minutes, drain, remove the strings. Add the fat from the bacon to some roast beef gravy, season with catsup or Worcestershire; boil up once and pour over the olives. Serve very hot.

Corned Beef Hash.—Chop the cooked corn beef very fine, then add the chopped vegetables, using three times as much or more than the meat. Put into a frying pan and moisten with some of the liquor left from the boiled dinner. Serve hot with a poached egg on each portion. This makes a good luncheon dish.

Creamed Liver.—Use chopped left-over cooked liver, add to a rich white sauce and serve on buttered toast. This makes a good breakfast dish.

We meet and mingle; we mark men's speech;
We judge by a guess, by a fancied slight;
We give our fellows a mere glance each,
Then brand them forever black or white.
—Richard Burton.

EASY LUNCHEON DESSERT.

A dessert for the noonday meal should be a very light one such as a dish of fresh or canned fruit, a cooky or small cake with the hot drink. There are, however, many desirable desserts which may be served in small amounts which are appropriate.

Jelly Fluff.—Take half a glass of jelly and the white of one egg; beat until stiff and the mixture will stand alone. Heap in sherbet cups and top with a spoonful of whipped cream or the white of egg beaten with sugar.

Baked Pears With Lemon Sauce.—Use large firm pears; core, but do not peel; place in a baking dish; add sugar, bits of butter and lemon juice with the grated rind. Baste with this during the baking, adding a little water if needed. Serve hot or cold with cream or a thin boiling custard.

Caramel Cornstarch Pudding.—Brown a half-cupful of sugar until it forms a sirup in a smooth frying pan, then add a pint of boiling milk; stir until the caramel is dissolved; add two tablespoonfuls of cornstarch to a little cold milk. Pour into sherbet cups; garnish with a spoonful of whipped cream topped with a piece of preserved ginger.

Rice Pudding.—Place a half-cupful of rice in a baking dish with two quarts of milk, a half-cupful of brown sugar and a half-cupful of raisins; flavor with cinnamon or nutmeg and bake three hours in a slow oven until the rice has absorbed all the milk.

Waffles.—Waffles with cold sirup makes a most delightful dessert for a luncheon. Beat thoroughly one egg; add two cupfuls of sour milk; mix and sift together one teaspoonful of soda and two teaspoonfuls of baking powder with two cupfuls of flour. Add to the first mixture with one tablespoonful of melted shortening. Beat well and bake on a hot waffle iron.

Snowballs.—Spread cooked rice an inch thick over small squares of coarse muslin wet in cold water. In the center place a canned peach, pear or apricot. Tie carefully and steam ten minutes. Remove the cloth and serve with a sauce made from the fruit juice.

Nellie Maxwell

Concerning the Story of Wraps

The story of winter wraps has reached its climax, as it always does, with the arrival of the opera season. It begins early in the fall with a recital of the affairs of the stalwart coats that must bear the brunt of real service throughout the winter, and progresses through many an engrossing chapter dealing with more pretentious garments. Finally comes the resume of the brief and splendid careers of evening wraps, some of them wholly frivolous. But each season witnesses certain coats that are as rich and as useful as any; they are the best efforts of the couturiers, and include the incomparable coats of fine furs.

In the same class with these, so far as beauty is concerned, are the two impressive wraps that the camera has reported with such fidelity, shown above. They are made of the handsomest fur fabrics and completed with collars of natural fur of the best grades. Each is worthy of the other.

The coat at the left is made up of a lustrous and very beautiful material which is a replica of broadtail. It is ample and enveloping with lines that are managed with wonderful skill, so that it seems to cling to the figure. The sleeves have deep, flaring cuffs that partly cover the hands. There is the simplest of narrow girdles at the front and a big, luxurious shawl collar of fox fur. No brocade, however rich, or cloth of gold can outclass magnificent furs or do more than vie with, as perfect a semblance of them as appears in this coat.

The textile fur in the coat at the right is like sealskin, but more supple It has a cape-yoke and sleeves cut in one with the body. Its lining is a silk crepe and the wide collar and deep cuffs are of martin fur. The design is especially becoming to slender figures and the coat is so excellent in style and rich in appearance that it belongs in the class with sealskin. Like coats of natural fur, these may appear day or night at any sort of function.

Ingenious Small Wraps of Fur

Although there has been a certain amount of reaction, in the direction of simplicity in fur garments, the mode finds place for much that may not be classed as simple. For last winter designers vied with one another in making small wraps that embodied several different styles in one garment—capes, coatees and scarfs were all suggested in a single hybrid. The designers were endlessly ingenious and the cleverness of these smaller garments gave them a charm that made a very successful appeal. So much so that the same idea has reappeared this season in fur wraps and there is a hint of it in the wide scarfs of brushed or angora wool that are furnished with belts to match.

Among the new models those that are most like a scarf, prove to be the most useful. By discarding the belt they may be worn with a tailored suit when extra warmth is required. Worn with a one-piece frock and belted down they become a coatee, wonderfully becoming and convenient for afternoon or evening wear. One of the best of the new models of this kind appears at the right of the two shown in the picture. It is made in several furs; kolinsky, mink, dyed squirrel, sealskin, are all effective in it, but the furs having a dark stripe are best. It is shown in kolinsky with a wide cape collar and a narrow belt. The stripes in the skins are placed to run diagonally across the ends at the front and a fringe of tails adds an appearance of considerable length. The collar may be brought up in the muffler fashion.

The muff to match is smaller than the average, but it is soft and nearly flat—in the approved style.

Seal and leopard are combined in the chic coatee at the left in such a way that each enhances the beauty of the other. The leopard skin looks like a small sleeveless jacket and its brilliance is softened by the indefinite markings in the pelt and a very generous shawl collar of sealskin. This wrap has three-quarter sleeves and a narrow belt of sealskin. It extends in panels (that widen toward the bottom) below the waistline at the back and straight in front, leaving the hips uncovered.

Julia Bottomley

An Ideal Trimming.

How glad one ought to be to see the ostrich feather come back as trimming for hats for middle-aged women. It has a softness about it that no other hat ornament ever had and is more becoming to old faces than the harsh trimmings that have been in vogue so long.

For Chandeliers.

Apply pure vinegar with a small sponge; afterward wash in soapsuds and polish with flannel or chamois. To renovate tarnished metallic parts paint black with the dull black paint used for ebonizing. Or apply white, gilt or any other enamel paint desired.

POOR ENGLISH PLACE-NAMES

Pessimistic and in Many Cases Derogatory Appellation Given for No Apparent Reason.

For a people upon the whole cheery and possessed of much homely philosophy, the English have shown a surprising amount of pessimism in their choice of place-names, remarks a Canadian soldier now in England. Withal, their Mount Pleasants and the Coldharbors, Starveacres, Starvecrows, and so forth. But for stark pessimism the writer knows no place-name to beat that of a northern farmstead situated at the exposed end of a bleak, unkindly valley which always seems much colder and more foggy than any of the near-by heights. The name is Bad End—simply. One of its occupants was hanged, but so far as the name goes this must have been effect rather than cause, for the hanging was recent, while the name antedates the oldest inhabitant's recollections. Cackle street, Darwell Hole, Old Hole, Bugshill, Poppinghole, Froghole, Pigstrood, Platnix, Kitchenhour, Grandturzel, Little Nineveh, Tubslake, Brownbread street, are a few merely old place-names recalled at random, and all to be met with in a day's march along the beautiful Sussex-Kent border country.—Montreal Herald.

Both Right.

"Philip, I think you married me for money." "Well, dear, I believe I earned it don't you?"

WILL NOT USE GERMAN DYES

Real Reason Why the Red Trousers of the French Infantryman Have Been Discarded.

The red trousers of the French army are to be no more. There is a political and economical tragedy about it with which very few people are familiar. The originator of the red trousers was Napoleon, who was prompted in his "reform" by a desire to help the native cultivation of madder root against the Dutch and Italian rivals.

But then came the Graebe-Liebermann discovery of the alizarine dyes, and in less than ten years, between 1870 and 1878, the production of madder root in France shrank from 25,000 to 500 tons, and then it disappeared. This was a great German victory. Nevertheless, the army trousers continued to be dyed red, only this time the dyes had to be imported from Germany. It evidently required a great war to put an end to this humiliation.

A Salutary Lesson.

"You've been up in an airplane?"

"Yes," replied the prominent citizen, "and it did me a lot of good."

"How was that?"

"At an elevation of 7,000 feet in the air for the first time in a long and active career I realized how little I really amounted to."

Artificial lace that is more durable than the genuine is being made by a French inventor from cellulose.

It's This Week That Counts

It is now a matter of hours. If today and Saturday pass without speedy action on your part, the responsibility rests with yourself.

This Saturday night, November 29--at 8 o'clock sharp--is positively your last chance to enter subscriptions in the News-Bulletin's big automobile and prize contest and secure "First Period" votes--the maximum number to be allowed. After this time and throughout the remainder of the contest there is a material decrease in the voting power of subscriptions. Long term subscriptions count most, and a few such orders now from unexpected sources might win the decision in the race. You can only lose by holding subscriptions back now; and, after the time for action has passed, all the regrets in the world will be of no avail.

This Week

FIRST PERIOD.

Embracing the first four weeks (terminating Nov. 29) the following number of votes will be issued on subscriptions:

1 year	$1.75	3,000
2 years	3.50	8,000
3 years	5.25	12,500
5 years	8.75	25,000

Next Week

SECOND PERIOD

Embracing the fifth and sixth weeks (terminating Dec. 13) the following number of votes will be issued on subscriptions:

1 year	$1.75	2,000
2 years	3.50	6,000
3 years	5.25	10,000
5 years	8.75	20,000

The Last Week

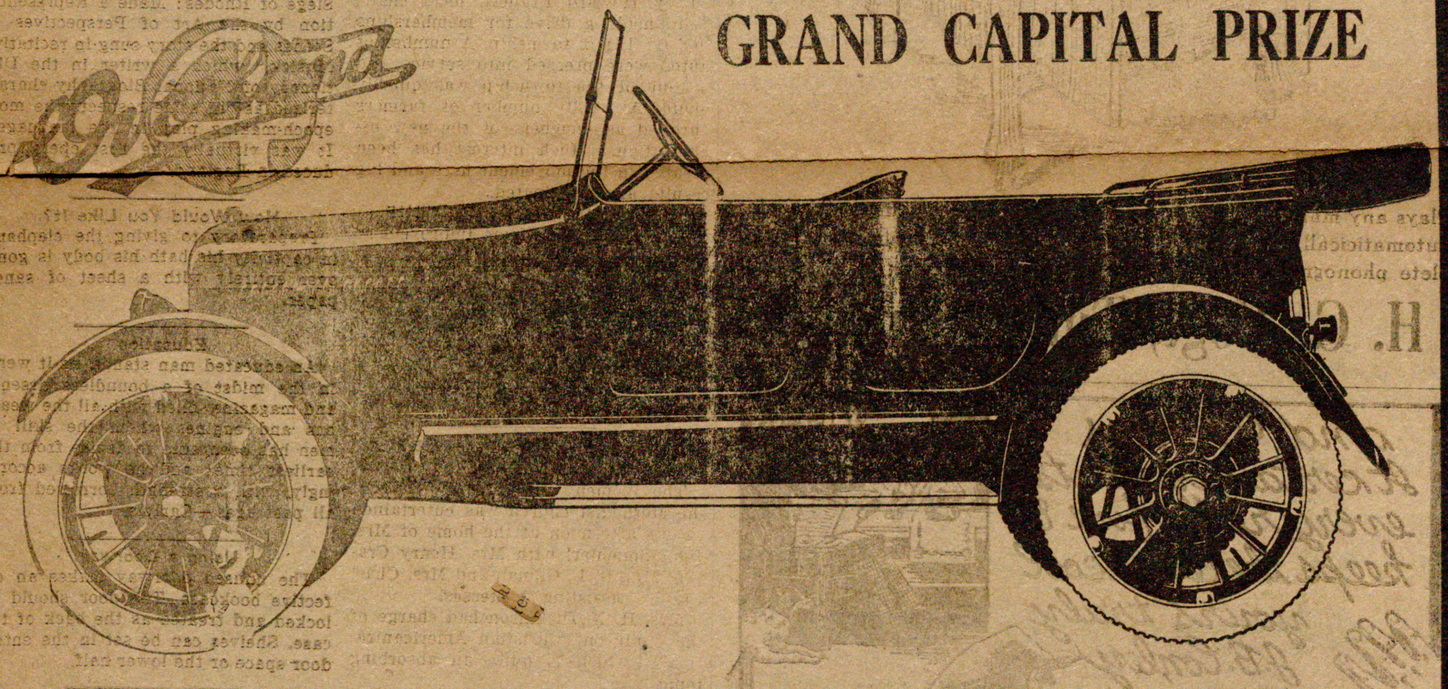
THIRD PERIOD

Embracing the seventh and last week (terminating Dec. 20), the following number of votes will be issued on subscriptions:

1 year	$1.75	1,500
2 years	3.50	4,000
3 years	5.25	7,500
5 years	8.75	15,000

It's This Week's Work That Will Count!

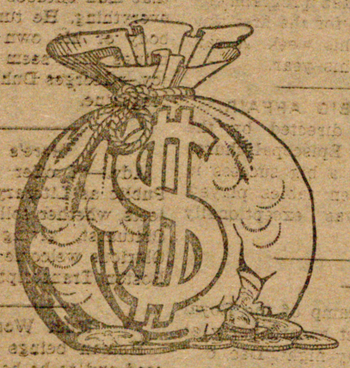
GRAND CAPITAL PRIZE



1920 Model Overland Touring Car, Complete with Extra Tire, Chains and Spot Light, Worth $960.

COLORADO VACATION TRIP -- 2nd Prize

BROOKS $200 PHONOGRAPH--3rd Prize



$50.00 IN GOLD COIN,
Fourth Prize.

$25.00 IN GOLD COIN,
Fifth Prize.

And a 20 per eent cash commission to all active non-prize winners.

Mokena

NEWS ITEMS.

Rev. Julius Besold, formerly of Mokena, is now located at New Orleans, where he is in charge of an Evangelical church. Thursday of each week he goes to Biloxi, Miss., to preach in the Evangelical church there.

Miss Edna Besold of Mannheim spent the week-end with her friend, Miss Alma Beckstein.

Mr. and Mrs. Albert Hatch of Chicago, Mr. and Mrs. Tom Harvey and Mr. and Mrs. Herman Grassle of Joliet were guests at the John A. Hatch home over Sunday.

Mrs. William Semmler has been quite ill with a severe siege of grip the past week.

The infant child of Mr. and Mrs. George Lauffer was baptized Sunday by Rev. William Kreis.

HOLD FIRST WINTER DANCE.

The Entertainers of Mokena conducted the first of a series of winter dances at the Mokena hall Saturday night. There was a good attendance and every one enjoyed a good time. The Entertainers are living up to their name and they surely know how to entertain. These dances will be held every two weeks. Plenty of amusement is planned for the winter season. A masquerade dance will be given soon.

Herbert Morsarty has many sales booked. He will have charge of the sale of J. H. Moore, Orland, December 2, and W. R. Lynk, Marley, December 9.

All former interstate phones have been connected up with the Bell system and long distance service has been established. The service between Mokena and Frankfort is very good now.

The Rock Island has a force of men engaged stringing new telegraph wires. The men are boarding in the company cars on the track here.

Mokena has received a supply of soft coal the past week. Local coal dealers had to await a release order from the superintendent of the Rock Island railroad before the coal could be unloaded and delivered.

The many friends of Karl Krapp are glad to see him back on the job at the Mokena State bank following an enforced vacation through illness.

Mrs. Georgia McGivney moved to Joliet Friday, where she will make her future home. She has been a resident of Mokena for many years.

Rev. and Mrs. W. J. Kennitz have been attending a convention of the Lutheran church held at Riverdale the past week.

CLASS TO BANQUET.

The C. I. C. class of the Methodist church was entertained Tuesday evening at the home of Miss Eunice Hacker. The written resignation of Mrs. Wm. Semmler, teacher of this class since its organization a year ago, was read and accepted. Mrs. Thomas Clyde has been appointed to be the successor of Mrs. Semmler.

The post card books, on which the members of the class have been working during the summer, have been finished and will be sent to the Community Day nursery at Joliet and the Guardian Angels' home, Joliet, for the amusement of the children. The class also donated $300 to Peter McCarthy superintendent of the Morning Star mission, Joliet, for mission work.

The class is planning on packing and shipping a barrel of clothes to the Lake Bluff orphanage as a Christmas gift to the little ones there.

As the class has rounded out a year of its existence the occasion will be observed with a banquet Saturday night of this week at the home of Mr. and Mrs. Thomas Clyde. The next meeting of the class will be held the second Tuesday in December at the home of Miss Grace Frisch.

Matteson

Matteson, Nov. 22.—Mr. A. H. Ammann of Peotone, who is traveling representative for the Peter's Shell Co., was in Matteson recently in the interest of organizing a gun club. Trap shooting is a little expensive just now on account of the high cost of ammunition, shells retailing for $5 per 100 and clay pigeons at $8 per thousand, making it cost about six cents per shot at the traps. However the sport is less expensive than golf. No doubt there will be a great increase in the interest of shooting at traps. Many a boy who did not know how to handle a gun before the war now does, and will keep up his interest in shooting.

Dr. and Mrs. C. A. Hercules motored to Versailles, O., the past week to visit with the latter's folks.

The Matteson Volunteer Fire department directed a Thanksgiving dance at the village hall on Wednesday evening. There was a good crowd and all enjoyed a good time.

The Joliet and Eastern Traction company is making a noteworthy improvement by filling in the trestle work of the Grand Prairie cuts.

Saturday night a community center meeting was held at the village hall. A very excellent program was rendered. Moving pictures, good music and dancing were some of the features.

Everyone interested in the community center work being carried on in Matteson should read without fail the book presented by Rev. M. Mount of Chicago Heights to the library, entitled "Fear God in Your Own Village." The book has to do with social center work in a small village and is very applicable to local situations.

Miss Gooch, who is giving an interesting course of lectures every Wednesday evening at the public school building, one class for the pupils and another for the grownups, spent the entire day making herself generally useful visiting homes, where she might be of service.

SALE DATES

W. R. Lynk, Marley, Dec. 9.

John Nieland, Monee, Nov. 28.
Mrs. A. C. Holl, Frankfort, Dec. 2.
Henry J. Holl, Frankfort, Dec. 5.
Mrs. Arthur Kohlhagen, Frankfort, Dec. 17.
Louis Schroeder, Frankfort, Nov. 29.
Walter Marti, Frankfort, Dec. 10.
I. H. Moore, Orland, Dec. 2.

FRANKFORT NEWS

THE SICK LIST.

Mrs. G. Lambrecht, who has been ill with tonsilitis, has developed quincy sore throat and is still quite ill and confined to bed. Her many friends hope for a timely recovery.

Stuart Zechlin underwent an operation at the Silver Cross hospital, Joliet, Friday, for the removal of his tonsils and adenoids. He is doing nicely.

Mrs. Henry Ross, residing three miles south of here, is quite ill.

Miss Elizabeth Weitendorf, who has been quite ill for several weeks, is improving.

The Thanksgiving dance, directed by the Frankfort Hall company Wednesday night, was a very successful affair. This is the first dance of the winter season to be given here.

Public Sale

The undersigned will sell at public auction at his place of residence, three-quarters mile south of Orland, known as the Harmony Farm, on

TUESDAY, DECEMBER 2, 1919,

Commencing at 9 o'clock sharp, the following described property:

14 HEAD OF HORSES—1 bay mare in foal, 6 years, 1,500; 1 bay mare, in foal, 5 years old, 1,400; 1 bay mare, 6 years old, in foal, 1,400; 1 roan mare, 4 years old, in foal, 1,400; 1 black gelding, 5 years old, 1,500; 1 sorrel gelding, 4 years old, 1,300; 1 brown gelding, 3 years old, 1,400; 1 black filly, 2 years old, 1,300; 1 gray gelding, 2 years, 1,300; 2 yearling colts, and 2 spring colts.

ONE IMPORTED BAY STALLION—1,800 LBS.

30 HEAD OF CATTLE—10 cows giving good flow of milk and the balance yearlings and 2-year-old heifers. ONE PURE-BRED HEREFORD BULL.

IMPLEMENTS—1 Deering binder, 1 mower, 1 hay loader, 2 side delivery rakes, 1 hay rake, 1 corn binder, 2 broadcast seeders, 2 disk, 1 corn planter, 2 harrows, 1 Deere gang plow, 1 sulky plow, 2 walking plows, 2 cultivators, 1 disk cultivator, 1 grinder, 1 wood saw, 1 corn crusher, 1 wheat drill, 1 fruit spraying machine, 2 triple box wagons, 2 truck wagons, 1 low sleigh, 4 sets of harness, 1 saddle, 1 blacksmith set, 500 feet of gas pipe.

ONE FORD CAR.
